

Set up your POS system barcodes

This step is [required for payment services from Ladbrokes and bitcoin.com.au](#).

The payment products require you to import the series of blueshyft product barcodes into your store's point-of-sale system (eg Tower, POS, Computerlink, Access etc) that you use for processing transactions in your store.

To download the barcodes and import them into your point-of-sale terminal manually, click the links below:

[SodaKING barcode catalogue](#)

The steps are below:

- Call XchangeIT on 1300 551 212 and quote your 7 digit blueshyft store ID (eg. N56381T).
- Let them know you have signed on with blueshyft and require the barcode file.
- XchangeIT will then update your account details and send you the DD2 file containing the barcodes to your email
- Find the email that XchangeIT has sent to you.
- Import the barcodes for blueshyft into your POS system.
- If you're not a subscriber to Xchange IT, please contact your POS software vendor directly: Tower, POS, Access or Computerlink – ask them to help you load the product barcodes for blueshyft.
- Once you have imported the barcode into your till, please, log into the blueshyft iPad (see below) so we can run a quick test to check your barcodes have loaded.
